EDUCATION

University of Waterloo

Sep 2024 – April 2029

BASc in Systems Design Engineering, minor in Management Sciences

Waterloo, ON

- GPA: 91.66/100
- Relevant Coursework: Engineering Prototyping, Data Structures and Algorithms, Human Factors, Organizational Design

EXPERIENCE

Project Management Intern

May 2026 – Aug. 2026

Siemens Mobility

New York City, NY

- Established standardized system breakdown across engineers, clients, and the core project team by **translating technical requirements and constraints** into clear project standards
- Automated requirements traceability by developing context-driven scripts mapping owner, subsystem, and evidence attributes across **10K+ contract requirements**, cutting manual work by 40 hours
- Drove **alignment on project targets** across all team members and functions, ensuring adherence to internal standards and contract requirements

Enterprise Technology Management Intern

Sep. 2025 – Dec. 2025

Toyota Canada Inc.

Scarborough, ON

- Shipped a Python-based vehicle allocation tool in 10 weeks by mapping Inventory Planning team business logic into a data-driven model, **reducing 50+ hours of manual work to 2-minute automation**
- Directed development of a **vendor insight console in Power BI** by defining user requirements, mapping data sources and flow, and liaising with the Data Management team to build ETLs from SAP to SQL Server
- Led trade-off analysis for an enterprise endpoint management tool by identifying **use cases, pain points, user requirements, and enterprise alternatives**, resulting in a cost-saving recommendation promoting company sustainability

EXTRACURRICULAR LEADERSHIP

Lead Project Manager

May 2026 – Present

Electrium Mobility

Waterloo, ON

- Established **program budget, timeline, and resource allocation** for a new EV competition team, grounding projections in the team's actual resource constraints
- Directed QFD charts and engineering design matrices to drive **trade-off studies**, identifying best-fit subsystem designs for material and integration decisions

Operations Lead

Oct. 2024 – Present

Waterloo Aerial Robotics Group

Waterloo, ON

- Coordinated with technical leads to align financial and logistical needs with prioritized initiatives, ensuring **resource allocation** matched **real-time engineering priorities**
- Redesigned internal procurement SOP by identifying and eliminating workflow bottlenecks, **cutting procurement cycle time by 30%** and accelerating resource acquisition
- Secured **\$10K+ in funding per term** by authoring proposals grounded in actual resource needs, translating engineering requirements into stakeholder-facing justifications

Program Lead

Sep. 2022 – June 2024

FIRST Robotics Competition Team 1257

Scotch Plains, NJ

- Directed **full-scale program operations** for a 100+ member robotics organization, introducing a new leadership structure and SOP framework that improved manufacturing efficiency and long-term sustainability

SKILLS

Program Management: Requirements Management, Risk Management, Agile/Scrum, Scheduling, Trade-Off Analysis

Project Execution: Stakeholder Management, User Testing, Knowledge Management, Executive Communication, Confluence

Tools/Technologies: SolidWorks, AutoCAD, Altium, MATLAB, FEA, Python, C++, Figma, Excel, Power BI, Git
