EDUCATION

University of Waterloo

Sep 2024 – April 2029

BASc in Systems Design Engineering, minor in Management Sciences

Waterloo, ON

- GPA: 91.76/100
- Relevant Coursework: Organizational Design & Technology, Digital Systems, Human Factors in Design, Data Structures & Algorithms, Impact of Information Systems on Organizations and Society

EXPERIENCE

Project Management Intern

May 2026

Siemens

New York City, NY

Enterprise Technology Management Intern

Sep. 2025 – Dec. 2025

Toyota Canada Inc.

Scarborough, ON

- Led product vision for a **Vendor Insight Console**, gathering senior-leadership requirements, mapping data sources (SAP, ServiceNow, SQL Server), and coordinating ETL development to deliver a unified vendor intelligence dashboard
- Delivered a 10-week pilot AI development program by building and debugging a Python/Flask allocation tool, **cutting a 200+-hour process to custom results in 2 minutes**, demonstrating the value of rapid internal automation
- Drove an end-to-end evaluation of the company's endpoint management platform, synthesizing **user feedback and market analysis into a cost-saving, modernizing recommendation** to promote sustainability and reduce spend by over \$10K

Web Development Intern

Jan. 2025 – Apr. 2025

Dundas Life

Toronto, ON

- Led design and launch of a client-facing life insurance platform, translating user research into a **responsive, conversion-optimized website** using Figma, GoHighLevel, and HTML/CSS/JS

EXTRACURRICULAR LEADERSHIP

Operations Lead

Oct. 2024 – Present

Waterloo Aerial Robotics Group

Waterloo, ON

- Built a finance management system to solve budget and procurement issues, working with technical leads to define requirements to streamline protocols and maximize visibility, enabling **faster approvals and efficient project execution**
- Drove organizational growth by securing **\$20K+ in sponsorships and partnerships** through stakeholder outreach and proposals that emphasized sustainable innovation

Program Lead

Sep. 2022 – June 2024

FIRST Robotics Competition Team 1257

Scotch Plains, NJ

- Directed **full-scale program operations** for a 100+ member robotics organization, introducing a new leadership structure and SOP framework that improved manufacturing efficiency and long-term sustainability
- Collaborated with engineering teams to set realistic build goals and deliver a competition-ready product 2 weeks early

PROJECTS

Event Aggregator Web App

- Built a full-stack platform using **React, TypeScript, and REST APIs** to simplify event discovery, allowing users to filter and visualize live events by location, type, and date in one cohesive interface

Ticketmaster UX Case Study

- Reimagined Ticketmaster's mobile UX in Figma, delivering a user experience and data-informed redesign that improved visual hierarchy, navigation clarity, and overall usability

SKILLS

Product Skills: Product Strategy, Requirements Definition, Cross-functional Collaboration, Data-Driven Decision-Making

Product Execution: Agile/Scrum, User Testing, Technical Documentation, Process Optimization, Change Management

Tools/Technologies: HTML/CSS/JavaScript, Python, React, SQL, Power BI, Confluence, Asana, Figma, ServiceNow, Excel
